

Methodist Church

Rev. J. Walter Morris, D. D.
There was a good increase in attendance last Sunday, both at Sunday school and the public services. Almost a dozen new scholars in the Sunday school. Everybody seems happy to get into the new church.
Next Sunday morning Dr. Morris will speak on "The Substance of Things Hoped For." There will be a "pep meeting" for men Sunday evening, led by the men. It will be a general discussion of men among men in community service, or "Religion From a Business Man's Point of View." All men are cordially invited to attend.
Several carpenters are generously volunteering their help after hours in finishing the new church. This little band of church people and their friends deserve the help and good will of the entire community.
A hint to the wise, they say, is sufficient. Some people never wake up until the procession has gone by. Now is the time to get in with this new and rapidly growing church.
On next Wednesday evening, Aug. 8, there is to be a big fellowship dinner at the church, free for all the members and friends. Everybody is invited to come and bring a basket to provide for yourself and family, and a friend. The ladies of the church will provide hot and cold drinks. Tables will be spread and all sit down together.

First Baptist Church of Torrance

Rev. J. Whitfield Green will preach both morning and evening sermons. Everybody cordially invited to attend.

"The Parable of the Four Kinds of Soil" was the subject of the morning message. In this parable Jesus sets forth the duty and responsibility of hearing the truth. He said "Take heed what ye hear" and "Take heed how ye hear." In hearing a message or song over the radio, your wire must be tuned in with the wire from the sending station; otherwise you will not hear it. So in hearing God's Word our hearts as well as our ears must be ready to receive it.
At this morning service Mrs. Brumpton was heard with interest and pleasure in the solo, "Crossing the Bar."
In the evening the pastor spoke on Martha and Mary, the women friends of Jesus. Martha was the practical mind—Mary the spiritual mind. Both are needed in developing Christian character.

Lomita Gospel Mission

The little chapel will be ready Sunday morning for Sunday school services at 9:45. Preaching service at 11 o'clock.
We want all who are not attending services elsewhere to come and worship the Lord with us. The chapel is in Brethren street.
If we walk in the light, as He is in the light, we have fellowship one with another, and the blood of Jesus Christ, His Son, cleanseth us from all sin.
If we say that we have no sin we deceive ourselves, and the truth is not in us.
If we confess our sins He is faithful and just to forgive us our sins and to cleanse us from all unrighteousness.
If we say that we have not sinned we make Him a liar and His Word is not in us.—I John 1:7-9-10.

NEW STATION OF EDISON CO. IS OPENED UP

Augmenting the electric energy distributed in Torrance and vicinity, distributed in Lomita and vicinity, and all of Southern California south of Tehacepi, the million-dollar power terminal of the Southern California Edison company, known as the new Laguna Bell substation, in the southeastern suburb of Los Angeles, went into service Tuesday morning, according to a message received by District Manager W. E. Oliver from R. H. Ballard, vice president and general manager.

This station, which is the largest on the Pacific coast and which is the first station in California constructed for operation at 220,000 volts, is the second step in making available to Torrance additional energy to be transmitted over the Big Creek lines by reason of their diversion to this high voltage. It will bear the 125,000 horsepower of new electric energy which comes on to the Edison lines this year from the construction of the largest hydro-electric power house west of Niagara Falls and 33 per cent additional generator capacity to the first power house on the Big Creek-San Joaquin project.

Describing the features of the new Laguna Bell station to The Herald, District Manager Oliver said: "Located as it is in the center of the main transmission system supplying the territory between Los Angeles, Long Beach and San Bernardino, from which distributing lines diverge, this station, with a capacity to deliver 150,000 horsepower to the various points in this area, will greatly augment the service rendered and provide for a large increase in the amount of business possible to be supplied."
"The most advanced ideas of outdoor construction both for 220,000 volts and 60,000 volts have been designed for this substation. The entire equipment is outdoors except the large condenser required for regulation of the lines of the 220,000-volt line and the switchboard equipment. This equipment is housed in a building 113 feet by 76 feet by 52 feet high, of concrete construction. It is situated in a tract 27 acres in area, which gives adequate room for additional equipment as needed to keep pace with this rapidly growing territory. Work on the station has been carried on since June, 1922, giving employment to 272 men, who have been taken care of by camp facilities at the substation site."

"In terms of increased community benefits, the output of this station will make possible the irrigation of 195,000 acres of land and supply the motive power for 1000 factories and will make possible domestic service of 60,000 homes."
"This station, in conjunction with the Eagle Rock substation, will be to the southern counties served by our company what the Vestal station, near Porterville, is to the San Joaquin valley."
